

The Navigating Care Portal Quick-Start Guide

Your Navigating Care™ patient portal allows you to view test results, easily communicate with your clinic, keep track of appointments, and learn about topics related to your health — all from your phone, tablet, or computer.

Menu in the top left opens all navigation options: home, messages, health records, education, calendar, journal, more, calendar resources, account, help, and sign out. The purple dot shows there's new information for you, which you can find by opening the menu.

You can navigate to any portal page from the **expanded mobile menu** by clicking the option you want to see. Options to logout or go to the FAQ and support contact pages are also available here. Select 'close' to collapse the menu options.

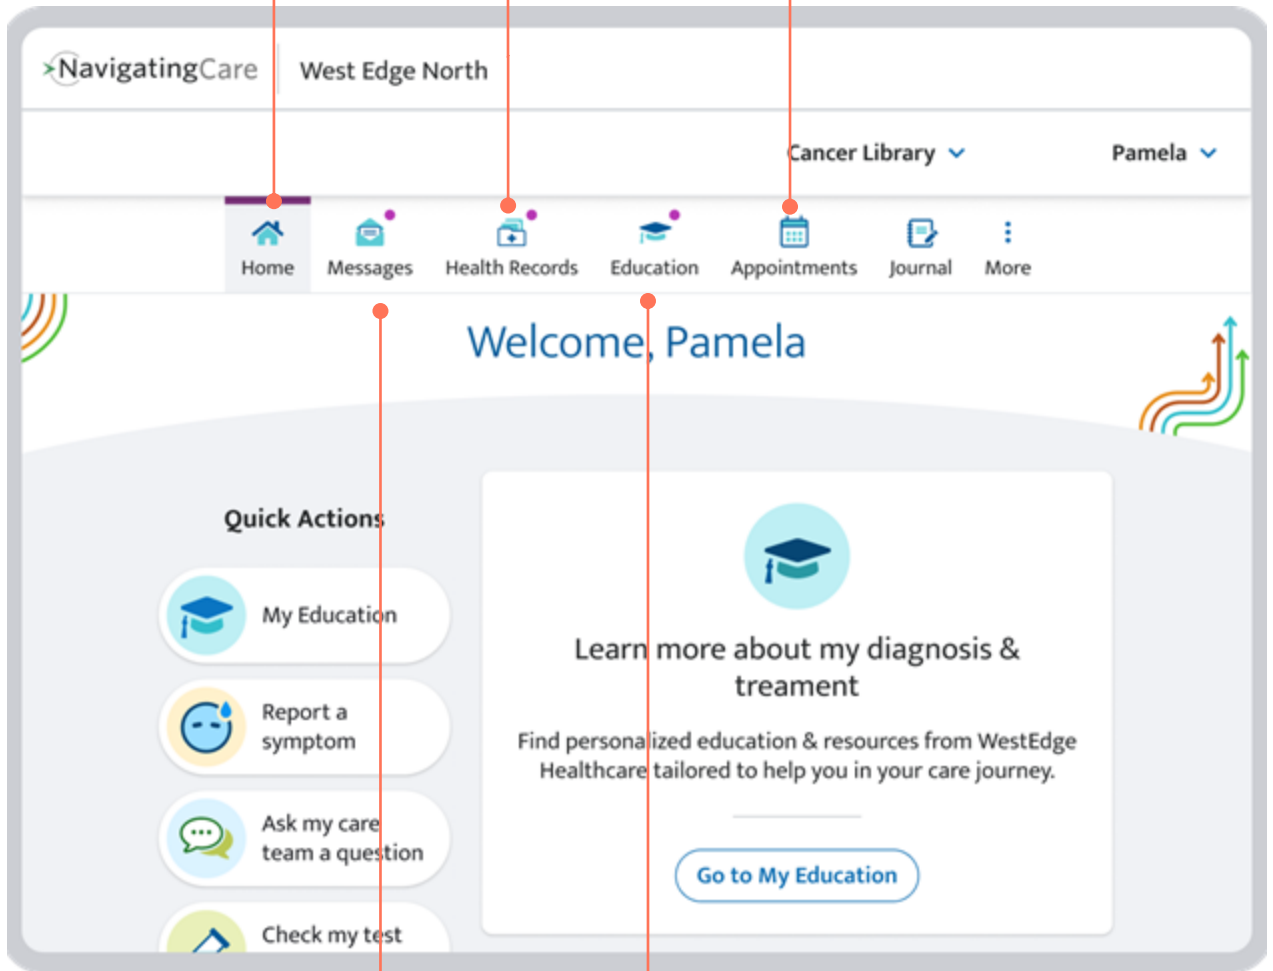

Home brings you back to your homepage, where you can find your Quick Actions menu and information about your clinic.

Health Records provides you access to your test results, vitals, medications, allergies and more. From there, you can email, download or print your record.

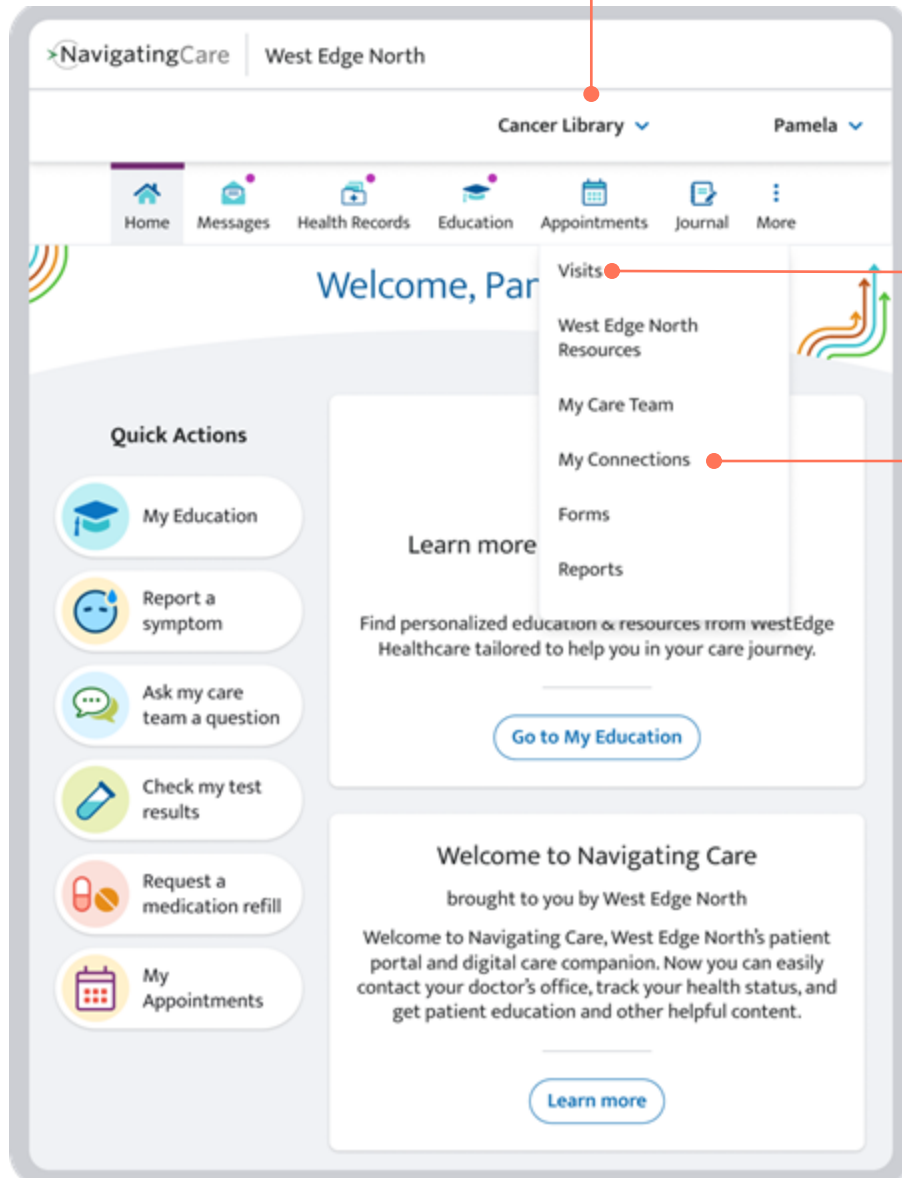

View **Appointments** for your upcoming appointments.

Securely exchange **Messages**, photos, and files with your care team for non-urgent matters and questions.

Read **Education** articles tailored specifically for you based on your diagnosis and medications.

Visit **Cancer Library** to find helpful articles and information about your diagnosis and treatment.

Select **Visits** to view a summary of your previous clinic appointments.

To make sure caregivers have access to your health information, add a caregiver under **My Connections**. This is where you manage who can view, download, and share your health records.
